Important Information for Correspondents and Customers

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

McGregor's Year Book

This new Year Book, our silent salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States—offering something for every garden, everything for some gardens. Years of experience in packing plants has resulted in methods enabling us to guarantee their safe arrival, and in the years of our business career our products have found their way into every state and territory and into many foreign countries. For over 40 years we have pleased the flower lovers of America, and the business today is under the direct control of the founders and their sons. Our guarantee is an asset with us and a safeguard to you, giving absolute security to mail order buyers. We promise you as fine stock as can be grown, a large assortment and good service, and we believe therefore, that this catalogue, which we hope will be found pleasing and helpful, is entitled to the consideration of all buyers.

Comparative Value of Roses Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

Advantage of Pot Grown Roses There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Instruction Leaflets On different pages in our catalogue we offer leaflets giving full Cultural Directions on practically all of the different classes of Plants that we sell. Offering leaflets in this way we are not compelled to ask from those who purchase a limited number of articles a large price for a complete book of instructions. The leaflets are carefully prepared and will be found to contain important and valuable information on the growing of subjects they cover. Price, 2c each.

If You Wish Orders Held Be sure to say so, then we can book your order until any later date desired; otherwise we assume order is wanted at once, and for shipment without further instructions.

Postage Stamps These can be sent for fractional parts of \$1.00, or when postoffice orders cannot be had, provided two cents in stamps extra are sent with every remittance. Send perfect stamps only.

Our Prices will compare favorably, we believe, with those of any responsible firm in the United States, and are so low we must ask cash with order.

Remittance With Order Please send sufficient money to cover your entire order. The safest way is by means of postoffice order. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under.

FREE OFFER If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the face of cover of this book, free. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses.

Surprise Offer—After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. As a result we generally have surplus of all kinds of plants and rather than carry this stock over, we hold a Clearance Sale beginning June 1, and make up Surprise Collections of miscellaneous plants at 98c per collection, six collections for \$4.88. In these 98c collections we give several dollars worth of plants. The plants in these collections must be strictly our selection. Orders accepted any time during the spring for delivery June 1st.

Parcel Post Shipments In years past the limit of able plants, bulbs and seeds was four pounds. Our parcel post system has extended the privilege of transferring packages through the mails and any reasonable sized package can now be sent by parcel post. Order, however, by mail, only such items as will permit the removing of the soil from the roots. (Postage table—Page 2).

Express Shipments If you wish plants sent with soil left on the roots always order by express. Large decorative plants, shrubs and all heavy stock must be sent by express.

Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items from this department (page 96) be shipped direct from our nursery under separate transportation charges.

Premiums Our terms being cash with the order enables us to give additional plants, bulbs, and seeds on orders amounting to \$1.00 or more, as follows: On \$1.00 worth of goods bought at single Plant, Bulb or Packet prices, select plants, bulbs or seeds to the value of 20 cents extra. On a \$2.00 order select 40 cents extra. On a \$3.00 order select 60 cents extra. On a \$5.00 order select to the value of \$1.00 extra. On \$6.00 select \$1.20 extra, etc. Larger orders, premiums in proportion.

Guarantee We guarantee all Shrubs, Plants, Bulbs and Seeds that we send out to points within the United States to reach purchaser in good condition, when forwarded by mail or express. After goods are delivered to purchaser our responsibility ends.

Why We Can Save You Money

Our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage.

Add Postage, Boxing and Packing Charges for All Mail and Parcel Post Shipments. See Table Below

Notice If goods are ordered by mail or parcel post, postage and package charges must be added (excepting for color plate offers) per table below, to cover boxing, packing and postage. Seed in packets posted free. Postage for pints and quarts must be added per table rates. This enables us to give our customers the lowest possible selling prices with delivery charges fair to all. Simply add postage and packing charges for every dollar or fraction of a dollar's worth of goods ordered according to the state in which you live. If you live in Alabama, add 6 cents for every dollar; if in Kentucky, add 4 cents for every dollar; if in Nebraska, add 7 cents for every dollar's worth ordered. Purchaser pays charges on all express shipments.

Remember that our premium offer more than offsets postage and packing charges, and that you may select 20 cents' worth of goods extra for every dollar's worth purchased, excepting on special offers and collections.

THE PLUMED FERN

Scholzeli The Ideal Plumed Fern

With the recent introductions of Ferns which have come from the original Boston type, there is no variety with heavier and more plumed fronds than Scholzeli. Its foliage is quite different from all other varieties of the family, and stands, in a class by itself. The plant makes a comparatively dwarf compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of special value. Japanese Lace Fern

One of the Most Beautiful and Popular
Foliage Plants of the Century
A Decorative Plant of Unusual Value.

(Asparagus Plumosus)—**26c**
The family of Asparagus plants
comprises a number of
varieties. Some are climbers, some droop-
ing or trailing, some erect and bushy.
Many of them are highly prized for their
beautiful and graceful foliage, and the
two varieties which we list on this page
are practically the most popular and val-
uable of all. The variety Plumosus (As-
paragus Plumosus Nanus) is a tall
climbing decorative plant and one of
the rarest and of delicate beauty.
Its bright green foliage is extremely
fine and plume-like. The fronds grow
from six to eight inches in width and
when cut retain their color and shape
for weeks. The plant may be grown
as a pot plant, a bushy form or
climbing. Asparagus possess the ad-
vantage of being more graceful and its
foliage finer than those of the most deli-
cate Fern. As a house plant it will
thrive under practically all conditions.
The Asparagus likes a good rich soil and
fairly warm temperature. The plant does
best and carries the richest color of
foliage when it is kept in a growing
condition through a plentiful supply of
nourishment. Nice plants, 26c each; 3 for
74c; \$2.50 per dozen. Stronger plants, 38c
each; 3 for \$1.08; \$3.65 per dozen.
Larger plants, 59c; 3 for \$1.60; \$5.66 per
dozen.

The Wonderful Hardy Climbing Rose

Climbing AMERICAN BEAUTY

"A hardy Climbing Rose which in size of flower, color, form and fragrance is equal to its parent, the grand cut-flower Rose, American Beauty."

SOFT GLOWING RED

(Hardy June blooming.) Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American production, the product of American Rose growers. It is perfectly hardy, strong growing, making canes from ten to fifteen feet in a season, a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red, identical with its pollen parent, the American Beauty, and with the same exquisite fragrance; a quality not found in all climbing Roses. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing or pillar or porch Rose is desired. It is one of the early Roses to bloom in the spring, coming into flower the latter part of May and the early part of June and continuing in full flower for a long time. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush Rose. Nice plants, 32c each; 3 for 90c; 12 for \$3.07. Strong 2-year plants, 65c each; 3 for \$1.85; \$6.24 per dozen. Extra large 3-year selected field-grown plants \$1.00, \$1.50, and \$2.00 each.

THE IDEAL FERN Roosevelt

A Notable and Valuable Novelty. Wins Prizes Everywhere.

The Grand Roosevelt Fern has had the most phenomenal sale of any decorative plant grown. Fronds broad and heavy, often measuring 6 inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive, yet graceful appearance, and owing to the fullness of the fronds even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect. Price, nice young plants, 24c; 3 for 68c; stronger plants, 50c; larger plants, 85c; heavy selected plants, \$1.25.
